1936 WASHINGTON INTRODUCTIONS

BOBEE DEAN (H. Smith) — Formal Decorative — A fine new cut flower of Jersey's Beauty formation and stem, but a more prolific bloomer, of soft apricot orange. Six to eight inches in diameter and five inches deep, with petals curving to the stem when in full bloom. A wonderfully useful dahlia for basket work, and the long keeping qualities, when cut, will assure its popularity for bouquets. Scored 85 at East Lansing Trial Gardens in 1935.-----\$10.00

UNION BEAUTY (C. H. Fulmer) — Small Single — 2½ to 4 inches. Base of petals, yellow, with entire petal striped scarlet red and white. Most petals have a scarlet oval in the white stripe. Orange reverse, which sometimes shows through, giving a very beautiful effect. Upright grower and a prolific bloomer. Won Certificate of Merit at Storrs' in 1935.-----Net \$1.50
